Art Unit: 1714

1. The amendment of 11/22/06 has been entered. Claims 1-2 and 11-17 are pending.
2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
3. Claims 1-2 and 11-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 00/44847 Burns et al..

Burns et al. disclose the instantly claimed adhesive compositions at the abstract; page 3, lines 10-31, particularly line 29; page 4, lines 1-31, particularly 25-31; page 5, lines 1-30, particularly line 20 which falls within the scope of the instant claim 16 while the remainder encompasses the “aminopolyether polyol” of the instant claims as does page 6, lines 1-26; page 6, lines 28-29; page 7, lines 1-31, particularly 10-13 of which DMDEE falls within the scope of the instant claim 17; and the remainder of the document. Page 5, lines 22-25 encompasses the instant claims 11 and 13. Page 4, lines 19-20 falls within the scope of the instant claim 12. If the aminopolyether polyol is intended to be part of “the catalyst” of claim 15, the aminopolyether polyol of the reference plus the exemplified amounts of DMDEE (e.g. page 20, lines 25-27) fall within the scope of the instant claim 15. No alkali metal ions are present which falls within the scope of the instant claim 2.

It would have at least been obvious to one of ordinary skill in the art at the time of the instant invention to use the above discussed combinations of materials which fall within the scope of the instant claims because they are encompassed by Burns and would have been expected to give the adhesives having the properties discussed by Burns. No unexpected results are seen in a manner commensurate in scope with the instant claims and the cited prior art.

Art Unit: 1714

Applicant's argument that the instantly claimed aminopolyether polyol having the instantly claimed ratio of ether groups to amino nitrogen is not disclosed is not persuasive. Consideration of all of the descriptors of the reference aminopolyether polyol, particularly the molecular weights, weight % of ethylene oxide groups, the figure which contains only one initiator molecule, the disclosed initiators which include triethanol amine of claim 16 as cited above, and the fact that a triethanolamine initiated polyether polyol made with the disclosed alkylene oxides and having the disclosed molecular weight of 1500 which is preferred (page 5, lines 14-17) will have the claimed amount of ether to amino nitrogen shows that the prior art encompasses the instantly claimed invention squarely. The applicant has not rebutted the above statement of obviousness rationale nor have they shown unexpected results in a manner commensurate in scope with the instant claims and the cited prior art. This rejection is therefore maintained.

**4. THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

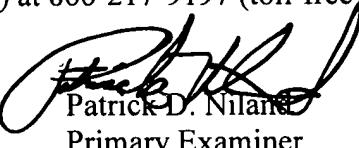

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
